[1] Compensation shown includes dependency allowances of 5 percent of net income for a spouse and $400 per child, and assumes, for presentation purposes, a family of four.

[2] U.S. nationals are not reimbursed for U.S. federal tax payments. However, under the Economic Recovery Tax Act of 1981, U.S. citizens are entitled to a deduction of $80,000 from overseas earned income in 1983.

[3] Residence provided by ADB.

[4] Under the Provisions of Section 3-B of the Asian Development Bank Act, the USED is entitled to compensation and allowances equal to those authorized for a Chief of Mission, Class 3, within the meaning of the Foreign Service Act of 1964. The USED is entitled to receive the salary ($67,200) of a Chief of Mission. He also has a residence provided by the U.S. Treasury Department.

[5] No U.S. citizens are involved. Compensation is paid in Philippine pisos; for illustrative purposes it is shown here in dollars converted at a rate of 9.2 pisos to the dollar and assumes no dependency allowance.

1/ Ranges after last salary adjustment, May 1, 1982. Salary paid to non-U.S. citizens; non-U.S. citizens are not liable for U.S. Federal and State income taxes on their Bank salaries. Salaries for EDs became effective after the Board of Governors vote in July, 1982.

2/ Salary paid non-U.S. citizens including dependency allowance consisting of (1) for spouse 5% of salary; (2) for each child $420. For presentation purposes we have assumed a spouse and two children.

3/ Salary paid U.S. citizens assuming spouse and two dependents; DC residence, and is "grossed up" by IBRD using average deductions, to bring their compensation to levels generally comparable to those enjoyed by non-U.S. World Bank employees and employees in comparator organizations.

4/ Assuming DC residence, 1 exemption, average deductions and no dependency allowances.

5/ In addition to the salary shown, the President receives a representation allowance of $37,000.

6/ The non-U.S. Executive Directors and Alternates are paid the net salaries shown, while the U.S. ED and Alternate are limited to the gross salaries paid to Executive level IV and V appointees, under the terms of PL95-148.

NOTE: The gross salaries shown for U.S. employees of the IBRD reflect the new method of computation that became effective on January 1, 1980, for employees joining after that date. Employees on-board prior to the end of CY 1979 will receive slightly higher salaries than show during a transition period to the new computation methodology that will end on December 31, 1985.

UNITED NATIONS FUND FOR DRUG ABUSE CONTROL

Allocations

Calendar Year 1982

UNFDAC allocations in 1982 totalled approximately $7.3 million. These funds were allocated according to a two-tiered approach: country programs received 79% of the 1982 budget and headquarters projects received 21%. Thus, UNFDAC directed the majority of its resources to twelve country programs. A country-by-country breakdown is available.* Budget expenditures are divided by sector as follows: "strengthening control measures" (36.4%), "reduction of illicit demand" (17.6%), "reduction of illicit supply" (4.3%), "research" (5.3%), "UNDP/UNFDAC working agreement" (8.3%), and "programme development and fund administration" (8/1%).

[1] This is a list of active projects in the countries listed as of that date. The projects could have been initiated in 1982 or earlier and the projects could have a life of 5 years or more. The value figure does not mean that much was expended in 1982. Listing includes both development projects ($2,642.565 million) and Emergency Projects ($278.346 million).

[2] WFP distributions in Afghanistan have ceased.

[3] All WFP activities on behalf of Kampuchea are on an emergency basis only.

EARMARKED CONTRIBUTIONS TO UNEP

According to Rule 203.2 of UNEP's Financial Rules, "Voluntary contributions shall be accepted without limitations as to use for a specific project or purpose." This effectively precludes the earmarking of contributions. In some of UNEP's regional environmental programs, however, trust funds have been set up to finance activities of regional importance. These trust funds are managed under UNEP auspices until the regional organizations they serve become sufficiently advanced to be able to manage the funds themselves.

Two Regional Seas action programs, the Mediterranean and the Kuwait, are presently active and functioning. Three additional regional programs (Caribbean, East Asia, West and Central Africa) are in the process of being organized.

Contributions to the Caribbean Trust Fund have reached $150,000. Negotiations are underway to establish a secretariat to implement the Caribbean Action Program.

Total of all Category III Countries	19.51	31.18	50.69

1/ Figures for Category I contributions are calculated using exchange rates in effect on December 8, 1980. This date was chosen because the rates then in effect were also used for establishing replenishment shares. Since several Category I countries made initial contributions in currencies which appreciated against the dollar in 1977-1980, the total Category I initial contribution appears here as $595 million rather than the $575 million pledged in 1977. Similarly, devaluations by a number of Category I members since December 1980 have reduced the dollar value of their replenishment contributions, and the overall Category I replenishment total. OPEC contributions are paid in dollars and are not affected by exchange rate movements.

2/ Reflects payments received as of March 15, 1983.

a/ The figures represent confirmed and expected pledges, rounded off in thousands of dollars.

b/ Commodities at donor's valuation.

c/ Received up to 24 October 1971. By resolution 2758 (XXVI) of 25 October 1971, the General Assembly, *inter alia*, decided "to restore all its rights to the People's Republic of China and to recognize the representatives of its Government as the only legitimate representatives of China to the United Nations, and to expel forthwith the representatives of Chiang Kai-Shek from the place which they unlawfully occupy at the United Nations and in all the organizations related to it".

d/ Includes contributions made by Abu Dhabi and Dubai before being part of United Arab Emirates.

e/ Special contributions to the Government of Jordan (in 1971) and the Syrian Arab Republic (in 1977) for the benefit of the Palestine refugees, for which UNRWA acted as executing agent. As these contributions were used for purposes budgeted for by UNRWA, they have been included in the Agency's income and expenditure accounts.

f/ Includes Joint Jordanian-Palestinian Fund contribution of $818,563, which was not incorporated in the Annual Accounts for 1981 (see also footnote to Table 11).

UN PROFESSIONAL EMPLOYEES - RETIREMENT - 30 YEARS SERVICE AND 60 YEARS OLD W/SPOUSE
NEW YORK - FEBRUARY 1983

* Annuitants contribute at 1/2 the rate of employees on active service.

** Secretary General's pension is 50% of gross salary payable at any age after serving of term of 5 years. Actual pensions for serving professional staff with 30 years service are 60% of the average of the highest 3 years of pensionable remuneration within the last five years of contributory service (service in excess of 30 years: Pension increases by 1% each year up to a maximum of 5%). For staff hired January 1, 1983, and later, pension will accumulate at rate of 1.5% for first 5 years of service, 1.75% for second 5 years, and 2% for all subsequent years.

Pensions shown on chart are computed on basis of 60% of the Pensionable Remuneration (col.3).

Military and economic assistance to Israel since the Arab-Israeli conflict of October 1973 231
Terms and conditions on Israeli military and economic assistance since the Arab-Israeli conflict of 1973 232

Station Housing Allowances

Housing and Cost-of-Living (COLA) Allowances are authorized for the purpose of defraying the average excess cost experienced by members on permanent duty assignments outside the United States. The excess costs are derived by comparison of the average cost-of-living and housing of members in each area outside the United States with the average cost-of-living and housing for similar members in the United States.

Depending upon the specific overseas location a member may receive either a housing allowance or COLA or both. In some locations where excess costs are negligible, neither COLA nor housing allowances are authorized.

Housing and cost-of-living allowances for military personnel are authorized by Vol. I of the Joint Travel Regulations (JTR). Rates prescribed therein are not special allowances applicable to military personnel on MAAG assignments but are applicable to all U.S. military members on permanent assignment outside the United States.

The following are examples of allowances authorized at specific locations selected from Appendices B and C of the JTR, Vol. I:

COUNTRY[1]	HOUSING ALLOWANCE[2]	COLA[3]
Denmark (Copenhagen)	$492.20	$234.00
Germany (Heidelberg)	266.20	None

POLICIES ON LOANS TO EMPLOYEES

Inter-American Development Bank
Asian Development Bank

The Inter-American Development Bank and Asian Development Bank do not have loan programs for housing, furniture, and education comparable to those of the World Bank.

In the case of the Inter-American Development Bank, employees can obtain loans for educational purposes from the IDB Credit Union and for housing purposes from the IDB Pension Fund. Both the Credit Union and the Pension Fund operate with employee funds and within the appropriate federal guidelines for such institutions.

INTER-AMERICAN DEVELOPMENT BANK

The Personnel Regulations of the Inter-American Development Bank permit the extension of interest bearing salary advances in the event of severe emergencies or as an assistance to employees who are relocated. The terms and conditions of these salary advances are:

Installation Advance -- Regular employees and full-time temporary employees with contracts of one year or more duration, are eligible for a salary advance for installation purposes at the new post of duty when they are contracted in a place different from their assigned post of duty or relocated to a new post of duty. Such employees may request an advance of up to one month's salary within a period of one year from the date of appointment or relocation. The advance must be repaid within a maximum period of 18 months, or by the end of the employee's contract, if it is less. There are presently 89 installation loans outstanding totaling $143,144. Interest of 4 percent is charged on these loans.

Emergency Advance -- Emergency advances are only granted in case of dealth in the family, grave illness, loss of property etc. The requestor has to have exhausted other means of procuring the funds. Interest is 4 to 11 percent and the term is up to 36 months, with 12 months being the norm.

There are currently 16 emergency loans for a total amount of $42,855 outstanding.

ASIAN DEVELOPMENT BANK

The Asian Development Bank makes the following loans available to its employees:

Settling-in loans -- New employees are eligible for a salary advance equivalent to three months' salary which is repayable over 18 months at 5 percent interest. An additional advance equal to $2,000 repayable over 12 months with interest at 6 percent per annum can be secured as can a subsequent advance of up to $2,000 which is repayable over 36 months at 11 percent. In 1982, 137 settling-in loans for $773,509 were made.

Other Advances -- The ADB will also make salary advances up to four months' salary, for advance rental payments, repayable over a period equal to the number of months of advance rental, with interest at 11.0 percent. In 1982, the ADB made 223 such loans for a total of $1,887,054.

Finally, the ADB will make special loans on compassionate grounds under the following terms: (1) advance of one months' salary after six months service repayable in six months at 5 percent interest; (2) advance up to two months' salary after 12 months service, repayable in 12 months at 5 percent interest; (3) an additional advance of up to four months' salary after 24 months service repayable in 30 months with interest at 11 percent. In 1982, the ADB made 302 loans on these grounds for a total of $419,622.

In 1982, the ADB made a grand total of 662 loans and advances for a total of $3,080,185 or an average loan of $4,652.

The World Bank

The expression, "The World Bank," means both the International Bank for Reconstruction and Development (IBRD) and its affiliate, the International Development Association (IDA). The IBRD has a second affiliate, the International Finance Corporation (IFC), which works closely with private investors from around the world and invests in commercial enterprises in developing countries.

The World Bank's activities have expanded significantly over the years. It is now providing close to $13.5 billion annually in support of projects in developing countries that are designed to raise productivity so that people, particularly the poorest in society, may live a better and fuller life.

The assistance is provided for a variety of projects, large and small, public and private. The projects are in such sectors as agriculture and rural development; education, health, nutrition, and population planning; electric power, energy, and industry; telecommunications and transportation; urban development and water supply. The Bank also gives nonproject assistance, including lending for structural adjustment, to help developing countries adjust their economic policies and structures in the face of serious balance of payments problems that threaten continued development. A short-term special action program—primarily in the case of IBRD loans—has recently been instituted that includes an expansion of structural adjustment lending and of sectoral lending for export development, rehabilitation and modernization of existing facilities, and financing of key imports for critical productive activities and of a greater share of project costs.

As part of its work, the Bank endeavors to help countries deal more effectively with the social aspects of economic development. These include problems relating to income distribution, rural poverty, unemployment, population growth, and malnutrition, providing better health care, sanitary conditions, and housing, as well as raising the productivity of small enterprises. Increasingly, funds from other sources, such as governments and multilateral institutions, export credit agencies, and commercial banks are associated with World Bank funds to cofinance parts of specific projects.

The IBRD finances its lending operations primarily from its borrowings in the world capital markets and provides loans at below-market interest rates to developing countries at more advanced stages of economic and social growth. IDA extends assistance on highly concessional terms to the poorest countries from the resources provided by its wealthier members. IFC uses its own resources to further economic development by promoting growth in the private sector of developing countries and helping to mobilize domestic and foreign capital for this purpose.

A total of 189 countries and territories are listed in this Atlas. As of June 30, 1983, 144 countries were members of the IBRD, 131 of IDA, and 124 of IFC.

[1] The GNP estimate has been derived by applying the *World Bank Atlas* methodology to official GNP estimates with the official commercial exchange rate. Several factors may influence both the level and the comparability of this estimate with those of other countries, and the Bank is aware of other estimates that have been made in Hungary's case. These have used methodologies that attempt to take account, severally, of price and wage distortions, subsidies and taxes, and possible distortions introduced through the exchange rate, and have provided a range of alternative results

[3] Excluding data for the overseas integral parts with home rule of the Danish realm.

[4] Excluding data for its overseas departments and territories.

[5] The GNP estimate has been derived by applying the *World Bank Atlas* methodology to official GNP estimates with the official commercial exchange rate. Several factors may influence both the level and the comparability of this estimate with those of other countries, and the Bank is aware of other estimates that have been made in Hungary's case. These have used methodologies that attempt to take account, severally, of price and wage distortions, subsidies and taxes, and possible distortions introduced through the exchange rate, and have provided a range of alternative results.

[7] Excluding data for its overseas administered territory. GNP per capita growth rate relates to 1973-80.

[8] GNP per capita has been arrived at, following the *World Bank Atlas* methodology, by using adjusted official Romanian national accounts data and converting them to U.S. dollars at the effective exchange rate for foreign trade transactions in convertible currencies. GNP per capita growth rate relates to 1977-80.

[9] Excluding data for its colonies, dependencies, and associated states.

[1] Estimates of GNP per capita and its growth rate are tentative.

[2] A number of methodological issues concerning the estimation of per capita GNP for centrally planned economies remains unresolved. Until a broadly acceptable methodology is developed, GNP per capita estimates for nonmember countries with centrally planned economies will not be shown.

Technical Note

Population figures are mid-year estimates prepared from material obtained from the UN Population Division, the U.S. Bureau of the Census, and the World Bank's own data files.

Gross National Product (GNP) is a measure of the total domestic and foreign output claimed by residents of a country. At market prices, GNP includes compensation of employees, operating surpluses, provision for the consumption of fixed capital, and indirect taxes less subsidies to producers. GNP in current values of national currencies is converted to U.S. dollars to make international comparisons possible. GNP per capita is obtained by dividing GNP at market prices in U.S. dollars by the total mid-year population.

Conversion of GNP to U.S. dollars uses a three-year weighted average of prices and exchange rates. In this edition, the three-year period, called the base period, covers the years 1979–81. The same base period is used for both the GNP for 1980 and for the GNP for 1981. This means that the difference between the GNP for 1980 and the GNP for 1981 not only reflects changes in real national income but also the rate of U.S. inflation. The use of the three-year base period is intended to smooth out the impact of fluctuations in prices and exchange rates. As the base period is changed every year, the data presented in the various editions of the *World Bank Atlas* are not comparable.

The conversion of GNP for a particular country proceeds in the following manner. The first step is to convert the constant market price GNP series in national currency units to one measured in constant average 1979–81 prices. This is done by multiplying the original constant price series by the weighted average domestic GNP deflator for the base period 1979–81 (i.e., by the ratio of total GNP at current prices to total GNP at constant prices for the period 1979–81). The second step is to convert the series measured in constant average 1979–81 prices in national currency to one in U.S. dollars by dividing by the weighted average exchange rate for the base period 1979–81. The weighted average exchange rate is the ratio of the sum of GNP at current market prices to the sum of GNP divided by the annual average exchange rate in national currency per U.S. dollar for the years 1979, 1980, and 1981. The third and final step is to convert the series measured in constant average 1979–81 U.S. dollars to one measured in current U.S. dollars by multiplication by the implicit U.S. GNP deflator with a 1979–81 base.

The use of official exchange rates to convert national currency figures to the U.S. dollar does not, of course, measure accurately the relative purchasing power of currencies. The United Nations International Comparison Project (ICP) has developed measures of real gross domestic product (GDP) on an internationally comparable scale by using purchasing power parities instead of exchange rates as conversion factors.[1] This project has covered 34 countries already and will ultimately cover about 75 countries. The World Bank, the United Nations as well as the UN Economic Commissions for Europe and Latin America, and other international agencies, such as the European Economic Community, the Organisation for Economic Co-operation and Development, and the Inter-American Development Bank are engaged in research on perfecting the methodology and extending annual purchasing power comparisons to all the countries of the world. Until such coverage is complete, however, exchange rates remain the only available means of converting GNP from national currencies to U.S. dollars. The table on the right gives examples of the differences between gross product per capita as conventionally computed and as computed using the ICP method.

Growth rates are average annual growth rates that have been computed by fitting trend lines to the logarithmic values of the population and of GNP per capita at constant market prices for each year of the time period. With this method, all available observations within the relevant time period are considered, and the growth rates obtained reflect general trends rather than cyclical factors or irregular variations in any particular year.
